

MN-32-008 Carpenter's hammer monoblock

Carpenter's hammer with "monoblock" handle and hammer face with magnet; with dedicated pouch

Features & benefits

- Metal hammer head and handle are made of one forged steel element (monoblock), inductively hardened, which provides the highest durability of the product
- Resistant rubber handle with anti-slip coating provides a secure grip
- Hammer head is equipped with a magnet that facilitates holding the nail to be struck.
- Hammer head is equipped with a profiled element, which is durable and inductively hardened, to pull out nails more easily

Applications

- Intended for roofing and joinery, quick sticking and pulling out the nails, forging and for prising components based on the lever principle

Equipment

- Special holster to be attached to a tool belt

Users

- Joiners
- Roofers
