

MN-32-001 Carpenter's hammer mono-supreme

Carpenter's hammer with "monoblock" handle and hammer head with magnet

Features & benefits

- Metal hammer head and handle are made of one forged steel element (monoblock), inductively hardened, which provides the highest durability of the product
- Resistant rubber handle with anti-slip coating provides a secure grip
- Hammer head is equipped with a magnet that facilitates holding the nail to be struck.

Applications

- Intended for roofing and joinery, quick sticking and pulling out the nails and for prising components based on the lever principle

Users

- Roofers
- Joiners
