

RT-HSSL HSS long drill bits

Ground HSS drill bits, extended, for a precise drilling of deep holes in steel and non-ferrous metal

Product information

Features and benefits

- Drill bits made of high-quality HSS steel, which ensures high durability
- Ground spiral enables you to drill precisely
- Double-sided geometry of the point (SPLIT POINT) ensures ideal centring and reduces pressure while drilling
- Point angle of 135° enables you to drill in hard steel
- Manufactured to DIN 340 standard, which ensures constant parameters and sizes of long drill bits

Applications

- Drilling deep holes in carbon steel, aluminum and non-ferrous materials

Base materials

- Structural Steel
- Metal Sheet & Profiles
- Aluminium
- Non-ferrous metals

Attention
