

RT-GDM Grinding wheels for steel

Angle grinder wheels for grinding construction steel

Certificate
EAC

Product information

Features and benefits

- High-quality European electrocorundum increases the service life of the wheel
- The hardness of S-discs is suitable for grinding structural steel
- The thick wheels are ideally suited to efficient grinding
- The resin binder is reinforced with 2 layers of mesh to protect the disc at high speed
- The internal bore of 22,23 mm allows for use with all angle grinders available on the market
- Manufacture in Poland guarantees high quality

Applications

- Designed for grinding construction steel

Base materials

- Structural Steel
